

Micro Swiss Brass Plated Wear Resistant Nozzle RepRap - M6 Thread 1.75mm Filament 0,6mm

Part Number: M2552-06

Made in USA by Microswiss LLC

This is RepRap style nozzle, it is made from a 360 brass base material and plated with TwinClad XT coating. TwinClad XT is a nickel composite coating designed for very low friction. It offers one of the lowest coefficient of friction, better than nickel with PTFE co-deposit. This coating is also very hard and abrasion resistant. If you are working with abrasive Carbon Fiber, Stainless Steel, wood filled or any other metal filled filaments, this will greatly improve the life of your nozzle.

*M6 Thread 1.75mm filament diameter

Orifice size available: .2mm, .25mm, .3mm, .4mm, .5mm, .6mm, .8mm

Made in USA by Micro Swiss

Fits:

- All printers with a E3D V4 / V5 / V6 1.75 Hotend
- Prusa i3 MK2 / MK2S / MK3 / Mini
- Anycubic
- JGAURORA
