

Micro Swiss Brass Plated Wear Resistant Nozzle for Creality K1, K1 Max, CR-M4 (0.4mm)

## Part Number: M2612-04

Made in USA by Microswiss LLC

Nozzle is made from a 360 brass base material and plated with TwinClad XT coating. TwinClad XT is a nickel composite coating designed for very low friction. It offers one of the lowest coefficient of friction, better than nickel with PTFE co-deposit. The TwinClad XT coating is also very hard and abrasion resistant. If you are working with abrasive Carbon Fiber, Stainless Steel, wood filled or any other metal filled filaments, this will greatly improve the life of your nozzle.

Orifice size available: .4mm, .6mm, .8mm, 1.0mm

### Fits:

- Creality CR-10 SE
- Creality CR-M4
- Creality Ender 3 V3 KE
- Creality K1
- Creality K1 Max
