

Micro Swiss Brass Plated Wear Resistant Nozzle for Creality CR-X 0,4mm

Part Number: M2800-04

Made in USA by Microswiss LLC

This is Brass Plated Wear Resistant Nozzle for Creality CR-X printers. Nozzle is made from a 360 brass base material and plated with TwinClad XT coating. TwinClad XT is a nickel composite coating designed for very low friction. It offers one of the lowest coefficient of friction, better than nickel with PTFE co-deposit. The TwinClad XT coating is also very hard and abrasion resistant. If you are working with abrasive Carbon Fiber, Stainless Steel, wood filled or any other metal filled filaments, this will greatly improve the life of your nozzle.

Orifice size available: .4mm, .6mm

Made in USA by Micro Swiss

Fits:

- Creality CR-X
- Creality CR-X PRO
- Sovol SV02
